<b>Packages</b>	<b>Description</b>
-----------------	--------------------

- |  |   |
|--|---|
| <ul style="list-style-type: none"><li>• <a href="#">XbPCRE</a></li></ul> | <p>An Xbase++ interface to PCRE, the Perl Compatible Regular Expression Library. Fast and full featured, XbPCRE allows you to perform full regex searches including sub-patterns, and retrieve information on the matches found. I've left the original <a href="#">Regular Expression Parser</a> available in case someone still wants it, but this one really is full featured.</p> |
|--|---|

Included in the package is a pre-compiled library, full source, a complete help file and an example/test project.

The latest version is 1.2, which fixes a memory leak problem and increases execution speed. Please read the version notes in the readme.txt file.

Many thanks to Evgeny Bogolyubov for finding the leak and finding a fix!
